

Your Road to Rockin' Invisalign!

Jennings
Walk of Fame Smiles

I rock out with my trays on for 20 hours a day!

1. New Patient Exam

2. Starting Invisalign

3D scan of your teeth (no impressions!), additional x-rays if needed, financial planning & contract.

3. Receive your Aligners

The 1st round of aligners should get you 80% finished and will take 6-8 months. We will place your attachments & teach you how to wear your aligners.

4. Progress Check

Quick appointments to check the movements on your teeth. We will see you back every 11 weeks.

5. Touch Up Aligners

3D scan to see what's left to fix. You will get all new aligners that will take you to the end!

Attachments are translucent bumps placed on certain teeth helping your aligners "grab" your teeth better.

6. Progress Check

7. Final Check

Making sure everything is perfect!

8. Invisalign Removal

We take off attachments & place retainers.

9. Retainer Check

Making sure teeth stay where you worked so hard to get them!

10. Final Retainer Check

Final check on your teeth & retainer. Follow up checks only as needed.

Brad Jennings, DDS, MDS

How do you decide which doctor to see for your Invisalign treatment? Many, including some dentists, think that Invisalign treatment is like buying a car in that every dealership is selling the same exact car, and the only difference is price.

Invisalign treatment is like playing guitar. Invisalign is the guitar, and the doctor is the musician. You have beginners, and you have Eddie Van Halen. Do you think experience matters in that scenario? Now consider that we're talking about your teeth and bite for the rest of your life. Think experience matters here? Absolutely! Dr. Jennings is easily one of the most experienced Invisalign doctors in all of Houston.

Welcome to Jennings Orthodontics

Choosing an Orthodontist for yourself or your child is an important decision. You only get your teeth once so you want to make the best choice for their care from the start. At Jennings Orthodontics, we strive to offer the latest treatment options in a relaxing, fun & rock-friendly environment. Plus, we provide the most flexible financing options where you're in control of your payments.
